PCHG-AS22000 22kW OBC

STARWELL

1.General description

The PCHG-AS22000 series OBC has been designed for larger power charger application, three phase AC input,540VDC-700VDC output. It can use in bus, commercial truck, and can withstand harsh environments(vibration, thermal shock and extreme temperature ranges).

The PCHG-AS22000 series is design as liquid cooling with IP67 enclosure .

The PCHG-AS22000 series is programmable with the independent control unit inside, this make it flexible to achieve the individual needs of customers.

With the multi grid adaptability and the independent control unit , it is in full compliance with international standards such as SAE J1772 and EN61851.

The processor-driven charging algorithms provides optimal results in efficiency and it contributes to a longer life of the battery charger and the HV battery.

2.Main Feature

- Compliance with three phase AC input .
- Compliance with SAE J1772 and EN61851.
- Compact and lightweight construction.
- Constant power and constant current charging capable.
- Vibration-resistant and IP67 for on-board use.
- Firmware up-gradable over CAN bus.
- DC High Voltage Interlock Loop (HVIL) protection.
- Precise and efficient charging power.

3. Function and Feature

Туре	
Туре	22KW on-board charger
Model	PCHG-AS22000
Rate Output Voltage	540V
Charging mode	Response mode (can communicate)

AC Input	1phase/ 3-phase	Unit
Input voltage range	90-265/152 480	V
Input frequency range	47 – 63	Hz
AC current THD	< 5	%
Power factor	> 0.99	
Efficiency	> 94 @ from 50% to Max load	%
Max. input current (eff)		А
Max input power	22	kVA
INRUSH current	< 40 @ 380 Vac	А

DC output		Unit
Voltage programmable range	0 - 7 0 0	Vdc
Min. voltage Constant Power range		Vdc
Charging voltage accurancy	≤1	%
Charging current accuracy	≤5	%
Charging current ripple amplitude	≤1	%
Max. output power	19.2	kW
Max. charging current	36	Adc
Output response time	≤2	S
Pre-charging	internal	

Environment Requirement		Unit
Ambient temperature range in operation	-40~85	°C
Ambient temperature range for storage	-40~95	°C
Ambient temperature range for extreme		
storage (less than 12 hours at a time)	- 40 to + 125	°C
Humidity	5-95	%
IP protection	IP67	
The cooling function	Liquid cooling

On Board Charger

	, and the second se			
Charging function	support@starwell.cc			
Charge function	Charging according to BMS communication			
Communication function	CAN bus control			
Communication protocol (to BMS)	By SAE J1939/Defined by customer			
CAN communication baud rate	250/500 kbps, without terminate resistor.			
AC charge control	Compliant SAE J1772 and EN 61851 When SAE J1772 is enabled, the charger is fully compliant with SAE J1772 Power Station (EVSE SAE J1772 compliant, level 1 and 2). When EN 61851 is enabled, the charger is fully compliant with EN 61851 Power Station.			
Wake-up	12V signal Hardwire wake up BMS wake-up command CP,CC signal wake up			

STARWELL

Protection function		
Over voltage protection	can be self-recovery from input or output over-voltage shutdown	
Under voltage protection	can be self-recovery from input or output under-voltage shutdown	
Short circuit protection	Output short circuit shutdown, self-recovery	
Over temperature protection	When the temperature of the radiator is higher than 75 $^{\circ}$ C, the output power is reduced, when the temperature is higher than 95 $^{\circ}$ C, the circuit is disconnected, and when the charging temperature is restored to below 85 $^{\circ}$ C, the output of the charger is restored.	
Reverse connect protection	Output Reverse Switch-on does not start, alarm, normal work after recovery	
Equilibrium potential and ground protection	The resistance between the conductive part directly touched by the human body and the potential equilibrium point in the vehicle charger is not more than 0.1Ω . The grounding point of vehicle charger should have obvious grounding mark.	
Power-off protection	Cut off power supply in abnormal condition	

STARWELL	On Board Charger		
Dielectrics trength	Input-output 3750VAC		
Dielectrics trength	Input/Output-Grand 1500VAC		
Clearance and Greenege	Input-output 4mm/6mm		
Clearance and Creepage	Input/Output-Grand 2mm/3mm		
Insulation performance	20ΜΩ		
Harmonic current	Meet standard of GB17625.1-2003 6.7.3.1		

Reliability		
vibration resistance	Through frequency sweep vibration test in three directions of X, Y and Z, parts	
Vibration resistance	are not damaged and fasteners are not loosened.	
impact resistance performance	Meet standard of GB/T15139-1994 6.5	
Industrial solvent resistance	Metal parts have good anti-corrosive coating	
Salt fog resistance	Meet standard of GB/T 2423.17	
Durability	Not less than GB/T 24347-2009	
Electromagnetic interference		
resistance	Meet standard of GB/T 18487.3 11.3.1	
Electromagnetic abusive Meet standard of GB/T 18487.3 11.3.2
